Professional Profile

I am a dedicated Frontend Developer with a solid foundation in HTML, CSS, Tailwind CSS, and JavaScript. I have experience in creating responsive user interfaces and optimizing web performance. With ability to communicate effectively with team members and an enthusiasm for continuous learning .
I am highly motivated to expand my knowledge in new technologies and methodologies, and I am eager to apply my skills to contribute to innovative projects. My collaborative approach and strong attention to detail ensure that I can work efficiently within a team and deliver high-quality results.

Work Experience

10/2022 - 01/2024

Full-Stack Developer
MST Medien-Systemtechnik GmbH
Stuhr, Germany

Medien-Systemtechnik is a one-stop technology provider for congresses, conferences, trade fairs and events.

- Developed an app for stock and employee management using Vue.js, Tailwind, SQL, and Laravel, which improved the company's management processes.
- Worked with GitHub branches.
- Maintained technological equipment and computer systems, ensuring the smooth operation of events.

09/2021 - 03/2022

IT Officer
Finnova (EU) - Internship
Brussels, Belgium

A European foundation supporting innovation financing in companies, regions, and municipalities, specializing in sustainable development, circular economy, water and waste management, employment and youth, ICT, and tourism.

- Maintained the main website and created various internal project websites using WordPress with Elementor; optimized and increased the visibility of different projects.
- Designed and customized forms with Jotform for efficient data collection.
- Managed online events to ensure smooth operation and engagement.
- Updated and organized data in Excel for accuracy and analysis.
- Managed email campaigns with Sendinblue, focusing on design, segmentation, and performance tracking.

03/2019 - 06/2019	Front-end developer
	Ibermática - Internship
	Madrid, Spain

Offers advanced technological solutions for Industry 4.0, integrating from engineering to the plant to optimize production in industrial SMEs.

- Worked as a Front-end developer in a team of programmers.
  - Made modifications to the company's website : using HTML5, CSS3, Bootstrap, and JavaScript in Visual Studio Code.
  - Used GitLab to control modifications and contributions to the web.
- Followed the Scrum methodology, which helped me develop my ability to adapt to new changes and requirements during a project, provide accurate feedback, and enhance my autonomy and responsibility.

Other Project

01/2024 - 08/2024

My website

- Developed my own portfolio using Vue.js and Tailwind, where I provide information about myself and my career.
- Started a section for uploading projects, each with a link to the website and the repository on GitHub.

German

I have also spent time learning and practicing the language.

Education
